

ULTRA-ZONE™

Forced Air Zone Controls

DATA SHEET

Model MA-ESR

Spring Return

The MA-ESR is a two wire, round spring return motor actuator. The MA-ESR is normally used on the Model ND and URD dampers. The motors can be wired in parallel off of (1) 40VA transformer. One 24V 40VA transformer can power up to (5) dampers. A built in auxillary switch can be used to interlock various field components. The switch is rated for 24VAC only.

EWC Control Panels

- M6 - Power Close
- M4 - Power Open
- M2 - 24V Hot
- M1 - Common
